MARIS AI TECH

ADAPTIVE MARITIME CYBERSECURITY

1 VALUE PROPOSITION

CYBERSECURITY THAT EVOLVES

In the era of rapidly increasing cyberattacks and growing risk of insurance claim denials due to exclusion clauses, static security is no longer enough.

MARIS AI is an adaptive, modular cybersecurity system that evolves with threats — **without the need to replace** your entire infrastructure.

THREAT.
EXPANDING MARKET.
easing in frequency and sophistication,
more connected. The market for

WHY MARIS AI

ONE ARCHITECTURE.
THOUSANDS OF POSSIBLE CONFIGURATIONS.

Modular by design. Software + Hardware + AI Agents.

CORE
Secure foundation & orchestration

→

PLUG-IN MODULES
Adapt to vessel, port and infrastructure

→

AI AGENTS
Continuous monitoring & response

→

EDGE & HARDWARE
Onboard processing, sensors, secure integration

MODULARITY
Quickly adapt security to each vessel, port and shore infrastructure.

SCALABILITY
From individual vessels to entire fleets and maritime ecosystems.

INTEROPERABILITY
Integrates with existing IT/OT systems and industry standards.

FUTURE-READY
Add new modules and AI capabilities as threats evolve — without replacing your entire infrastructure.

PROTECT THE ASSET, NOT JUST THE NETWORK

A modern ferry is a highly connected, digital asset — integrating navigation, propulsion, cargo operations and passenger systems.

STENA RORO – NEWMAX (2,800 LM)

~$65M

per vessel (pair order)

Modern RoRo ferries with hybrid propulsion and advanced digital systems.

DFDS – 6 ELECTRIC FERRIES (PROGRAM)

€1 BILLION

for six battery-electric ships

≈ **€167M per vessel** (programme average)

New generation ferries with battery-electric propulsion and high level of digitalisation.

WHAT DOES A FRACTION LOOK LIKE?

Even a small percentage of vessel CAPEX creates a significant budget for modern cybersecurity.

0.1%	0.5%	1.0%
of €167M =	of €167M =	of €167M =
€167K	**€835K**	**€1.67M**

EVEN A FRACTION OF THE VESSEL CAPEX IS A SERIOUS BUDGET FOR MODERN CYBERSECURITY PROTECTING THE WHOLE INVESTMENT.

Sources: Veson Nautical (Stena RoRo NewMax ~$65M per unit, 2023) | DFDS (€1B for six electric ferries, 2024).

5 OUR CUSTOMERS

SHIPOWNERS & FLEET OPERATORS

- Modernization of existing fleets
- Newbuild integration
- Continuous cyber protection
- Operational resilience

PORTS & MARITIME INFRASTRUCTURE

- Secure port operations
- Protection of critical infrastructure
- Integration with port systems
- Compliance & risk reduction

SHIP DESIGN & ENGINEERING OFFICES

- Integration into new designs
- Class & regulatory alignment
- Cyber by design
- Long-term lifecycle support

EXPERIENCE. VISION. REAL SOLUTIONS.

Combining maritime industry knowledge with technology and AI to build a safer and more resilient maritime future.

Barnaba Pawełczak

CO-FOUNDER & CEO

Maritime and technology professional with a focus on innovation, digital solutions and industry collaboration.

- Industry experience
- Strategy & product
- Partnerships & growth

Maciej Michniewski

CO-FOUNDER & CTO

Technology leader with experience in complex systems, AI and cybersecurity solutions.

- System architecture
- AI & data solutions
- Security & integration

Advisory & Mentor Board

To be disclosed on call. Supported by industry experts and academic partners.

+5 Developers

Available through our existing business network.

Supported by the BSSC ecosystem

Mentoring and cooperation under the supervision of prof. Marek Grzybowski.

7

ECOSYSTEM, VALIDATION & GTM

STRONG ECOSYSTEM FOR REAL IMPACT

BSSC
BALTIC SEA & SPACE CLUSTER

We work with industry partners, class societies and technology providers to validate, integrate and scale MARIS AI across the maritime ecosystem.

Part of a strong ecosystem:

- Mentoring and cooperation under the supervision of prof. Marek Grzybowski.
- Access to maritime industry networks.
- Support in go-to-market activities.
- Product validation with industry partners.

VALIDATION
with industry partners

GTM SUPPORT
in go-to-market and business development

INDUSTRY ACCESS
shipowners, ports, operators, engineering offices

ACADEMIC & EXPERT SUPPORT
prof. Marek Grzybowski

8

HARDWARE PARTNER

FROM SOFTWARE TO COMPLETE DEPLOYMENT.

MARIS AI works with a technology partner to provide the hardware layer, enabling a complete, ready-to-deploy solution: edge computing, sensors, local AI, integration and maritime-grade security.

- Satellite connectivity
- Cameras
- Sensors
- Edge computing
- Local AI
- Integration

We don't just detect threats.
We build an adaptive security layer around the vessel.
